Dear Texas Longhorn Breeders,

Welcome to the 2014 Butler Breeder’s Invitational. Each year, the Butler Breeder’s Invitational is committed to offering not only the finest in straight Butler cattle, but the finest in Texas Longhorns as well. This commitment is shared by our consignors and we are proud to be associated with them. We encourage you to contact them if you desire additional information on any of the sale lots. As Butler Texas Longhorn breeders, our commitment is two-fold. To the cattle, our commitment is to preserve and promote them to the best of our ability. To the people, it is to treat everyone with respect and welcome you as a guest in our own home.

Once again, our sale offering includes something for everyone. You will find proven producers, extremely high quality young stock with unlimited potential, bulls as well as frozen embryos and semen that can help take any program to the next level. Top breeders have long recognized that the best Texas Longhorns in the industry all have one thing in common: Butler Genetics. For seventeen years, the Butler Breeder’s Invitational has been the source for the finest in Butler breeding. The cattle market is soaring to all-time highs and now is an excellent time to take advantage of this positive market trend as prices are expected to climb even higher!

As an added feature, this year’s sale will be Webcast by HorseAuctions.com giving those who cannot attend, the opportunity to view and then phone bid on cattle they may be interested in. There will not be bidding on the webcast. All bidding must be done by using the sale day phone number. If you are interested in using this service, please call ahead for prior approval and more information.

We invite you to return with us to Lockhart for the great cattle and fun times the Butler Breeder’s Invitational has come to represent. As always, for everyone associated with the Butler Breeder’s Invitational, we thank you for your interest and your participation!

JANIS WEBB

After sixteen wonderful years, the heart and soul of the Butler Breeder's Group and the Butler Breeder's Invitational, Mrs. Janis Webb, felt that it was time to retire. She is a force, and a presence impossible to replace. Her dedication, commitment and love for not just the Butler Bloodline, but for the Butler people served as an inspiration and strength to those around her.

Together, with her husband Vernon, they formed VJ Longhorns and soon began acquiring elite Butler genetics from DeWitt and Evelyn Meshell. A lifelong friendship was formed and the cattle produced have made a profound and lasting impact on the Texas Longhorn breed. From a relatively small herd sprung a long list of household names including VJ Tommie, MF Double Droopy, VJ Nestor, VJ Smarty, OT Superior’s Droopy, VJ Mamu, VJ Hannah, VJ Curly Girl and the Iodine line of cattle, to name a few.

From the beginning, she was much more than just the sale coordinator; she handled all aspects of our cause, never asking for thanks or recognition. In fact, she seems embarrassed by both.

Much of our success and the survival of the Butler bloodline is due directly to the efforts of Janis. It is a debt that cannot be repaid. At times like this when words fail, we simply say:

"Janis, thank you and we love you!!"

The Butler Breeders
A pure Butler Texas Longhorn is a longhorn whose genetics trace back to only cattle originating in the herd of Mr. Milby Butler. This is a very simple statement to make but determining which cattle do indeed trace fully to the Butler herd has been far more complicated.

There are seven accepted subfamilies within the Butler bloodline. They are the herds of the Partlow family, F.M. Blackie Graves, the Meshell family, Ruel Sanders, Luman Holman, Forrest Lepper, and Virgil Shinn. Over the years all of these herds, except those of Lepper and Shinn, contained longhorns of non-Butler breeding in addition to their straight Butler animals. There are also Butler cattle which do not fall into these subfamilies. These would be found in herds such as J.W. Isaacs, the Wright family, and Pauline Russell. There also existed a group of animals which lived within these subfamilies and throughout the breed that were claimed to be straight Butler but which, as a result of paperwork mistakes, carried pedigrees that did not reflect their true genetic heritage. To determine which cattle did or did not trace fully to the original Butler herd, extensive and exhaustive research was done. Countless numbers of conversations and interviews with scores of people were conducted. Thousands of photos were viewed or taken. Pedigrees, personal notes, and records were examined. We saw everyone and everything that had a connection to Butler cattle. We heard facts, legends, lore, lies, theories, rumors, secrets, innuendo, and accusations. We have the testimony of the men that registered these cattle. It was concluded that there were in fact quite a few that were unquestionably straight Butler, many of which were some of Milby’s very best. If they were truly 100% Butler, shouldn’t they too be included in the bloodline? We said yes. In the end, one factor alone guaranteed acceptance as straight Butler: the brands. Unlike paperwork, which becomes separated from the animal, brands stay with the animal for life. And as any good cowman knows, brands tell a cow’s life story. If the brands identified it as Butler, then it was Butler. A Butler brand verified its true ancestry and simply reflected mistakes made at the time of registration, usually when the cattle were already mature. Anyone understanding the pitfalls and limitations of beginning a registry for a breed as diverse and old as the Texas longhorn can see how a breed that historically had survived for so long on their own, would have a family tree that would be hard to recreate and document. Many cattle regretfully were rejected because they did not have the proper brands to serve as irrefutable proof. What remains is a group of cattle which we can stand behind and know in our hearts are among the purest Butler Longhorns available.

Some would ask who are we to make such decisions and what gives us the right to do so. No one gave us the right, we stepped up and seized it. We are the Butler Breeders. We have always been Butler breeders. We bred and promoted straight Butler cattle while Texas Longhorn industry psychics and consultants predicted that pure Butler cattle were a fad that would not last; that was in the 1980’s. We’re still raising pure Butler cattle. We did the research and we did our homework. Your sale hosts alone have nearly 65+ years of commitment to this bloodline. Along with the help of other Butler breeders respected for their dedication to and knowledge of this bloodline, the Butler Breeder’s Invitational screening committee pledges to offer only the best representatives possible. This includes the rejection of animals that do not conform to the genetic and phenotypic criteria required. Simply having papers that reflect a straight Butler pedigree does not guarantee acceptance to this sale. Unfortunately, breeders that disagree with our standards may suggest impure motivation on our part. But for us, this is about the cattle, not about people. Our goal is to raise the finest, 100% genetically pure Butler Texas Longhorns possible so as to preserve this magnificent bloodline for the future. Butler cattle have been our love and our lives. We hope Mr. Butler would be proud.

If you would like to know more about the Butler Breeder’s Invitational or the Butler bloodline and to research Butler pedigrees, please visit our website: www.butlertexaslonghorns.com.
