Butler Breeder's Invitational

Registered Texas Longhorn Cattle

September 3, 2016

Dear Texas Longhorn Breeders,

Welcome to the 2016 Butler Breeder's Invitational. Each year, the Butler Breeder's Invitational is committed to offering not only the finest in straight Butler cattle, but the finest in Texas Longhorns as well. This commitment is shared by our consignors and we are proud to be associated with them. We encourage you to contact them if you desire additional information on any of the sale lots. As Butler Texas Longhorn breeders, our commitment is two-fold. To the cattle, our commitment is to preserve and promote them to the best of our ability. To the people, it is to treat everyone with respect and welcome you as a guest in our own home.

Once again, our sale offering includes something for everyone. This year will feature our largest selection ever of high quality heifers with unlimited potential. Added to that is an exceptional lineup of proven producers that can make a positive impact on any program. Whether your interest is in the history of the bloodline and the continuation of the last viable pure family of Texas Longhorns that still survives, or adding Butler genetics to blend programs as the essential key ingredient for superior results, top breeders have long recognized that the best Texas Longhorns in the industry all have one thing in common: Butler Genetics.

We invite you to return with us to Lockhart for the great cattle and fun times the Butler Breeder's Invitational has come to represent. For those who cannot attend the sale, phone bidding is available via the sale day phone. If you are interested in using this service, please call ahead for prior approval and more information.

As always, for everyone associated with the Butler Breeder's Invitational, we thank you for your interest and your participation!

COMMENTS: This cow was born from two great partnerships we have-- Michael McLeod with Dynamite and Hunter, Ed Shehee with Ace's Dayton Creole. Twist Again is extremely hard to part with. She is the kind of cow we strive to produce. Color, horn, temperament, pedigree, and the all important consistent production. She will work for you.

Breeding Information: Exposed to RVR Django from 4/24/16 to 8/15/16.

COMMENTS: Here you go, John! We are making good on a commitment made in 2010. At the 2010 BBI, we had no idea what an impact Five Star BR3 would make. The combo of her and Wrangler Chex has been phenomenal. It's difficult to let any of this combo go. Carmen Lee is big bodied, long legged and showing awesome horn growth. Our first Five Star offspring to sell since we have owned her. Don't miss out. Oh, by the way, Five Star measured 82.75" TTT in June, 2016.

Born: 3/8/2011

Color: White, brown sides, legs, ears

Bangs Vaccinated (OCV): Y

Breeding Information: Exposed to SCC Quantum from 3/17/16 to 8/15/16.

COMMENTS: This eye-catching young cow has one of the more unique colors you'll see, especially in the winter -- almost like a grulla. Her grand dam is SCC Spice, co-high selling lot at the 2010 BBI Sale. She's got a lot of Butler greats in her pedigree. We really like these exceptional female genetics! She sells bred to SCC Quantum (Superior x SCC Bold Lady). This breeding has so much potential! Keeping two heifers to replace her.

Breeding Information: Exposed to SCC Quantum from 1/2/16 to 8/15/16.

COMMENTS: A colorful young cow that has always produced color for us. Her dam, Jackie Lynn 396, was a big-horned, dark brindle cow (see her reference photo). We're keeping her 2016 heifer calf to maintain her genetics in our herd. This is also a rare opportunity to get a SCC Centaurus daughter. She sells bred to SCC Quantum (Superior x SCC Bold Lady). We think this is a good combination of linebred and outcrossed genetics.

COMMENTS: Princess Kate is as fine a young cow as we have ever produced. She is beautifully feminine, with good size, great conformation and those wide, perfectly twisted horns. Her pedigree is exceptional as well, with Delta Rockette on the top side and Miss Graves 910 on the bottom making her double bred FM Graves 102. Her mother is our best cow and this is the first time we've sold a daughter. Princess Kate's first calves were twin bulls and she sells bred to Little Ace RVR Ramrod, our George W. son.

COMMENTS: This beautiful young lady is of Loomis breeding (Farlap Chex) on the top and comes out of the heart of the Creek Plantation herd on the bottom. Pure Butler Texas Longhorn

A pure Butler Texas Longhorn is a longhorn whose genetics trace back to only cattle originating in the herd of Mr. Milby Butler. This is a very simple statement to make but determining which cattle do indeed trace fully to the Butler herd has been far more complicated.

There are seven accepted subfamilies within the Butler bloodline. They are the herds of the Partlow family, F.M. Blackie Graves, the Meshell family, Ruel Sanders, Luman Holman, Forrest Lepper, and Virgil Shinn. Over the years all of these herds, except those of Lepper and Shinn, contained longhorns of non-Butler breeding in addition to their straight Butler animals. There are also Butler cattle which do not fall into these subfamilies. These would be found in herds such as J.W. Isaacs, the Wright family, and Pauline Russell. There also existed a group of animals which lived within these subfamilies and throughout the breed that were claimed to be straight Butler but which, as a result of paperwork mistakes, carried pedigrees that did not reflect their true genetic heritage. To determine which cattle did or did not trace fully to the original Butler herd, extensive and exhaustive research was done. Countless numbers of conversations and interviews with scores of people were conducted. Thousands of photos were viewed or taken. Pedigrees, personal notes, and records were examined. We saw everyone and everything that had a connection to Butler cattle. We heard facts, legends, lore, lies, theories, rumors, secrets,

innuendo, and accusations. We have the testimony of the men that registered these cattle. It was concluded that there were in fact quite a few that were unquestionably straight Butler, many of which were some of Milby's very best. If they were truly 100% Butler, shouldn't they too be included in the bloodline? We said yes. In the end, one factor alone guaranteed acceptance as straight Butler: the brands. Unlike paperwork, which becomes separated from the animal, brands stay with the animal for life. And as any good cowman knows, brands tell a cow's life story. If the brands identified it as Butler, then it was Butler. A Butler brand verified its true ancestry and simply reflected mistakes made at the time of registration, usually when the cattle were already mature. Anyone understanding the pitfalls and limitations of beginning a registry for a breed as diverse and old as the Texas longhorn can see how a breed that historically had survived for so long on their own, would have a family tree that would be hard to recreate and document. Many cattle regrettably were rejected because they did not have the proper brands to serve as irrefutable proof. What remains is a group of cattle which we can stand behind and know in our hearts are among the purest Butler Longhorns available.

Some would ask who are we to make such decisions and what gives us the right to do so. No one gave us the right; we stepped up and seized it. We are the Butler Breeders. We have always been

Butler breeders. We bred and promoted straight Butler cattle while Texas Longhorn industry psychics and consultants predicted that pure Butler cattle were a fad that would not last; that was in the 1980's. We're still raising pure Butler cattle. We did the research and we did our homework. Your sale hosts alone have over 70 years of commitment to this bloodline. Along with the help of other Butler breeders respected for their dedication to and knowledge of this bloodline, the Butler Breeder's Invitational screening committee pledges to offer only the best representatives possible. This includes the rejection of animals that do not conform to the genetic and phenotypic criteria required. Simply having papers that reflect a straight Butler pedigree does not guarantee acceptance to this sale. Unfortunately, breeders that disagree with our standards may suggest impure motivation on our part. But for us, this is about the cattle, not about people. Our goal is to raise the finest, **100% genetically pure** Butler Texas Longhorns possible so as to preserve this magnificent bloodline for the future. Butler cattle have been our love and our lives. We hope Mr. Butler would be proud.
